

B&W Productions Wages System — REBUILD PACK

Everything needed to check a payroll, go back to a previous payroll, or rebuild the whole system (rules, look & feel, flagging) if this chat is ever lost

24 September 2026 · live version v2026-09-23-13 · git tag restore-2026-09-24-joshua-car · GitHub BWProductions/B-W-Costing (pushed 24 Sep)

How to use this pack. If a new chat/developer has to take over, give them this file (or the PDF) plus access to the GitHub repo and Cloudflare account. Section A is the checklist Bernie uses every week. Section B is how to go back. Section C is the complete rule book. Sections D–F are the technical rebuild.

A — WEEKLY TRIPLE-CHECK (Bernie’s checklist, every Wednesday before the auditor Excel)

Work **alphabetically, one worker at a time**, on /admin/wages. For each worker:

- 1. **Open reviews** — the orange **N open reviews** pill must be **0** before the Excel is pulled. Every red/orange review needs one click (see C7 for what each means).
- 2. **Duplicates** — same day, two rows? Scan the day columns. Same date + same or overlapping hours = one is a duplicate → **Edit shift** → amount **R0** with the reason “duplicate of #...” (or **Delete draft** if it was never final-submitted).
- 3. **Already paid last week?** — any row marked **MISSED SHIFT – actual date ...** (a date before last Saturday): was that date already in last week’s payroll? The **ALREADY PAID** review will say so with the paid row as proof. Only the **difference** is paid (C5).
- 4. **Place = rate** — every “Warehouse Team” row: does the venue / area / description name a place that is *not* the warehouse (FNB, Riverside, Pretoria, a stadium, a house/garden)? Then it is a **venue** (R95/h) or **garden** (R62,50/h), not warehouse. The system flags it (**WAREHOUSE CLAIMED BUT THE ENTRY NAMES “...”**); click **WAREHOUSE / VENUE**.
- 5. **Meeting deducted** — Mon–Fri warehouse rows that start at or before 07:00 must show “7,50 h paid (8,00 clocked)” in the hours column. Applies on public holidays too. Petrus too.
- 6. **Sunday** — warehouse R97,50/h, venue R114/h (×1.2). Gardener House work R75/h (R62,50 × 1.2). Petrus Sunday is **held** until you approve.
- 7. **Public holiday** — every entry is a red review; approve at the holiday rule (C4). If you set everyone’s hours for the day (e.g. “07–15 warehouse”), the next Monday’s **follow-up panel** asks the real end time per person; **only underpayments** get a top-up.
- 8. **Green figure** — the green *Admin approved: N hours · R...* must equal what you intend to pay. Yellow = claimed, green = approved.
- 9. **Deductions & loans** — the **Fixed deductions** and **Additional loans** panels near the bottom: is what is due this week right? (Erick car R1 000 · Isaac eggs R260 · Joshua car R1 000 from 26 Sep · loan instalments per C9.)
- 10. **Pull the Excel** — **Download Payroll Excel (new)** (/wages-admin/payroll.xlsx). Check the **Auditor Summary** grand total against the dashboard total. Save a copy as docs/BW_Payroll_<from>_to_<to>_AUDITOR.xlsx. Send to the auditors.
- 11. **Stamp** — ask the assistant to write “WEEK APPROVED R...” on the worker rows (payroll note) and to make a restore point (git tag + JSON snapshot of wage_shifts, wage_payroll_reviews, loans/deductions).

Never: type a rate by hand · change a row in a closed (already-paid) payroll · pay anything twice for the same hours · pay Sunday ×1.5 · pay R375 half-days or R650/R750 fixed days to general staff.

B — GOING BACK TO A PREVIOUS PAYROLL / PREVIOUS VERSION

B1 — Just LOOK at a previous payroll (no change)

Dashboard: <https://bwprodsystem.co.za/admin/wages?from=2026-09-12> (any payroll Saturday). Excel: /wages-admin/payroll.xlsx?from=2026-09-12. Closed payrolls render read-only in effect — rule 7 says never change them.

Payroll Saturdays so far: 2026-08-01 ... 08-29 · **09-05** · **09-12** (paid 17 Sep, R71 096,90 approved) · **09-19** (auditors 23 Sep, R64 933,86 gross) · **09-26** (next).

B2 — Go back to a previous CODE version (look & feel / rules as they were)

```
git clone https://github.com/BWProductions/B-W-Costing.git webapp && cd webapp
npm install
git checkout <tag> # see table below
npm run build
npx wrangler pages deploy dist --project-name bw-productions --branch main --commit-dirty=true
curl https://bwprodsystem.co.za/wages-version # must print the version in the table
```

Deploying code **never changes data**. Rows, reviews, loans stay as they are.

Tag	Version	What you get
restore-2026-09-24-joshua-car	v2026-09-23-13	Current live. Everything in this pack.
restore-2026-09-23-payroll-final	v2026-09-23-13	Same code; data snapshot of the 19–25 Sep payroll as sent to auditors
restore-2026-09-23-difference	v2026-09-23-2	Difference-only WAREHOUSE/VENUE buttons (4-line sum, before the owner’s single APPROVE wording)

Tag	Version	What you get
restore-2026-09-23-reopen	v2026-09-22-16	Reopen button, area-aware crew check
restore-2026-09-22-rules-v9	v2026-09-22-8	Hourly-by-place + Sunday ×1.2 + meeting; before crew check / holidays
restore-2026-09-22-rules-v8	v2026-09-22-7	Hourly-by-place (first version)
restore-2026-09-22-petrus-v6	v2026-09-22-6	Petrus R640 set day rule
restore-2026-09-21-already-paid	v2026-09-21-2	Already-paid rule; old Petrus rule; general staff still R750/R375 days
restore-2026-09-18-rolled-back	v2026-09-16-2	Before any already-paid / crew logic; Excel with editable HR cells
restore-2026-09-15-approved	v2026-09-15-x	Rate rules v4 + first Payroll Excel
weekly-wages-working-platform-baseline-2026-09-12	—	Baseline before this work started

B3 — Go back to previous DATA (undo a row/decision)

Every change session has a docs/restore-<date>-<topic>/ folder with * before.json (the rows as they were). To undo, the assistant runs UPDATE wage_shifts SET ... WHERE id = ... from that JSON. Deleted drafts/rows are also copied into wage_debug_capture / wage_deleted_shifts / wage_shifts_removed_audit. Folders: restore-2026-09-15-approved, -09-21-before-paid-before, -09-22-{petrus,rules-v8,stale-draft-720}, -09-23-{givemore,john,john2,joshua,holiday,final,loans}, -09-24-joshua-car.

B4 — Undo the most common single things

Undo...	SQL the assistant runs
Petrus rent deduction removal	UPDATE wage_recurring_deductions SET active=1, effective_to=NULL WHERE id=2
Joshua car deduction	UPDATE wage_recurring_deductions SET active=0, effective_to='<last day>' WHERE id=5
A review decision	click  Reopen on the dashboard (no SQL)
A row amount	 Edit shift with a reason (writes manager_update_reason; Excel shows "OWNER CORRECTION")
Planned end time for a day	DELETE FROM wage_planned_hours WHERE work_date='2026-09-24'

C — THE COMPLETE RULE BOOK (as live on 24 Sep 2026)

C1 — Payroll calendar

- Payroll week **Saturday** → **Friday**. Auditor Excel pulled **Wednesday**; Wed–Sun hours are best guesses, corrected by staff the following week (that is why the *Already paid* rule exists).
- Staff calendar allows **last Saturday** → **this Friday**. Older = “OLDER THAN ONE WEEK — cannot be final-submitted”. Later = “NEXT PAYROLL — capture it from Saturday”.
- A previous-week date captured now = **MISSED SHIFT**: real date kept, paid in the current payroll, pink pill, checked against last payroll.
- A draft is **R0** until Final Submission. After it: **Submitted** — **locked**.

C2 — General staff (hourly by place — rate rules v10)

Bhekizitha, Brian, Daniel, Erence, Erick, Isaac, John, Joshua, Patrick, Solomon, Thandanani, Thina (+ Givemore/Takavaudza when not doing House work; Lebo).

Place (from work type, cross-checked against venue/area/description)	Mon–Sat	Sunday ×1.2	Public holiday ×2
Warehouse	R81,25/h (R650 ÷ 8)	R97,50/h	R162,50/h
Venue / event (anything not warehouse)	R95/h	R114/h	R190/h

- Staff meeting 07:00–07:30 Mon–Fri unpaid** on warehouse entries (max 30 min = R40,63). Not on venue entries, not Saturday/Sunday. **Deducted on public holidays too** (deduct first, then ×2). Applies to Petrus too.
- Paid to the hour**, no rounding to days. Warehouse hours at R81,25 and venue hours at R95 are separate entries; travel gaps unpaid; overlapping entries counted once.
- Midnight split**: hours before 00:00 at that day’s rate, after at the next day’s (Sat 22:00–Sun 02:00 = 2×R95 + 2×R114 = R418).
- “Warehouse Team” only means warehouse when the PLACE says warehouse**. Venue/area/description naming FNB, Riverside, Pretoria, a stadium, botanical garden, a client’s house → venue (or garden). Anything that is not Meyerton / Henley / Randvaal / the warehouse address is “a place”. System flags; Bernie clicks.
- Examples: Wh Mon 06–16 = 9,5 h × 81,25 = **R771,88** · Wh Mon 07–16 = 8,5 h = **R690,63** · Wh Mon 08–16 = **R650** · Wh Sat 06–16 = **R812,50** · Wh Sun 06–14 = 8 × 97,50 = **R780** · Venue Mon 06–16 = **R950** · Venue Sun 08–16 = **R912** · Wh 06–12 + Venue 12–20 = R446,88 + R760 = **R1 206,88**.

Sunday ×1.2 and public holiday ×2 apply to EVERY place — confirmed by the owner 24 Sep 2026:

Place	Mon–Sat	Sunday (×1.2)	Public holiday (×2, held for approval)
Garden / House (gardeners)	R62,50/h	R75/h	R125/h
Warehouse	R81,25/h (Mon–Fri meeting 07:00–07:30 unpaid)	R97,50/h	R162,50/h (Mon–Fri meeting deducted first)
Venue / event	R95/h	R114/h	R190/h
Petrus	R640 set day 06–16 (+R55/h held Mon–Fri, +R80/h Sat)	held: R640 + R80/h outside	R160/h every hour, meeting deducted
Music Bus	R750 fixed 07–16 + R120/h outside	R120/h	R750 fixed 07–16 + R180/h outside

A public holiday that falls on a Sunday is priced as a public holiday (×2), not ×2 × 1.2.

C3 — Special people

Who	Rule
Music Bus (work type, usually John)	Mon–Sat R750 fixed for 07–16 + R120/h outside · Sunday R120/h · Holiday R750 + R180/h outside. Sat 08–22 = R750 + 6×120 = R1 470.
Petrus (Tsotlego Petrus Malakoane, staff 4)	R640 set day for 06:00–16:00 Mon–Sat, whatever time he arrives. Mon–Fri outside 06–16: R55/h held (red review: approve / other rate / R0). Saturday outside: R80/h automatic . Sunday: whole entry HELD (recommend R640 + R80/h outside; approve / other / decline). Holiday: R160/h every hour, meeting deducted, no fixed day (06:30–14:00 = 7 h = R1 120). No deductions, no loans (rent R450 ended 18 Sep).
Gardeners (Givemore staff 1, Takavaudza staff 2, Lebo staff 16)	House / House-Garden work R62,50/h Mon–Sat; Sunday ×1.2 = R75/h (owner 24 Sep). Holiday R125/h (held). Their Warehouse Team / Team Assistance work = general staff by place. Takavaudza Sun 20 Sep #9821 “Installing lights and garden work” → VENUE R684 (6 h × R114; owner 24 Sep — was R375 garden flat, then R450 garden Sunday).
Sharleen Ndlovu (staff 17)	Fixed weekly R3 000 (payroll_rule = fixed_weekly).
John Wed 16 Sep	one-off owner correction R105/h (historic).

C4 — Public holidays

Official gov.za list + Election Day **Wed 4 Nov 2026** (in SA_PUBLIC_HOLIDAYS in src/index.tsx and table wage_public_holidays). 2026 left: 4 Nov · 16 Dec · 25 Dec · 26 Dec. 2027 loaded. * **Never paid automatically** — every entry is a red review: **Approve public holiday — R...** / Other amount / Decline R0. * Rates: Warehouse R162,50/h (meeting off first) · Venue R190/h · Petrus R160/h (meeting off) · Music Bus R750 + R180/h · Gardener R125/h. * **Owner sets the day** (e.g. Heritage Day: “everyone warehouse 07:00–15:00”) → planned end stored in wage_planned_hours (2026-09-24 → 15:00) → any entry past it gets red 🚫 **CLAIMED PAST 15:00** → the following week’s dashboard shows the **Public-holiday follow-up panel**: per person, what was paid, dropdown of real end times 11:00–18:00 (half-hourly) each labelled as *paid / UNDERPAID, top-up +R... / worked less, nothing recovered, Confirm*. * **Owner rule (23 Sep, verbatim): “Even if they worked less, I don’t want anything to be done. I only want something to be done if we underpaid them.”** Top-up row only; never a recovery; answer written on the row (**HOLIDAY HOURS CONFIRMED**). * Heritage Day 24 Sep 2026 as approved: 9 men 07–15 wh **R1 218,75** · Patrick 06:30 **R1 300** · Petrus 06:30–14:00 **R1 120** · Givemore garden 08–15 **R875** · John wh 07–12 R731,25 + Music Bus 12–18 R1 110.

C5 — Already paid → pay only the DIFFERENCE (rule of 21 Sep, wording of 23 Sep)

When a current-payroll entry overlaps a **paid** row from an earlier payroll, one red review with proof and one sum, in the owner’s words:

Paid last week 08:00–16:00 · House/Garden · 8,00 h × R62,50 **R500,00** (shift #9705, payroll 12–18 Sep) **06:00–18:00 at a venue** 12,00 h × R95 **R1 140,00 Less the Garden already paid – R500,00 WHAT YOU SHOULD PAY THIS WEEK R640,00 [✓ APPROVE R640,00 — VENUE R95/h]** (small: No — he was in the warehouse instead (R434,38))

Approve pays the difference **on this week’s row** (last week’s row never touched), writes “DIFFERENCE ONLY: ...” into the payroll note and Excel, voids the hour-based overlap reviews as superseded. Nothing due → R0. “Change the hours” fold-out re-prices live at the same rate; **Bernie never types a rate**. Guard rails: current unpaid payroll only, only against paid rows, dashboard/Excel only, never the staff app.

Garden entry whose wording sounds like EVENT work — the office is asked (owner 24 Sep 2026, v2026-09-24-2). Owner: “Installing lights in a garden — you should have asked me if that’s a warehouse or a venue, because installing the lights could be a venue or garden work.” Every gardener House / House-Garden entry (Givemore, Takavaudza) is now read for event words — lights/lighting, install, set-up, strike/breakdown, rig, stage, sound, décor, draping, marquee/tent, function, wedding, party, event, tables/chairs, dance floor, festoon/fairy — and flagged red **GARDEN CLAIMED BUT THE WORK SOUNDS LIKE A VENUE JOB** with two buttons: **GARDEN — R62,50/h (Sunday R75)** or **VENUE / FUNCTION — R95/h (Sunday R114)**, each showing the rand. Works on paid rows (re-prices now) and drafts (applied at Final Submission). First case: Takavaudza Sun 20 Sep #9821 “Installing lights and garden work” — **owner decided VENUE: R684,00** (6 h × R95 × 1.2). Paid R375 on 23 Sep → shortfall R309 corrected on the same row.

C6 — Duplicates / double-tap (v-11, 23 Sep)

- Phone lock:** first press greys all buttons → “Saving... please wait”, full-screen overlay “Do not press again”; further presses swallowed; unlocks after 20 s.
- Save block:** new draft with same date + start + end as an existing draft or paid row is refused: “This shift (...) is ALREADY SAVED — it was not lost. Open it below and press Final Submission once.” Editing an existing draft is never blocked.

3. **Final-submit block**: draft whose hours lie inside a paid row (this or an earlier payroll) is refused: “*Not final-submitted: you have ALREADY been paid for ... Enter only the extra hours.*”
4. **Office catch**: Already-paid / overlap / crew reviews with the difference and one APPROVE; 🗑 **Delete draft**; 🕒 **planned-end pill**; stale drafts (before the window) in red with Delete.
5. **Excel = system**: R0 duplicates and approved differences appear identically in the Excel. Every refusal is logged in wage_debug_capture.

C7 — Reviews the office sees and what to click

Review	Colour	Click
ALREADY PAID — ... (paid_before)	red	APPROVE the difference / Nothing due R0 / change hours
WAREHOUSE CLAIMED BUT THE ENTRY NAMES “...” (crew_pattern, area-aware)	red	WAREHOUSE R81,25 / VENUE R95 (each shows the rand)
CREW PATTERN: 7 of 8 say Warehouse ... X says venue	orange	WAREHOUSE / VENUE
VENUE NOT NAMED	red	ask the worker; WAREHOUSE / VENUE
GARDEN CLAIMED BUT THE WORK SOUNDS LIKE A VENUE JOB (gardener entry mentions lights / install / set-up / strike / function ...) — owner 24 Sep	red	GARDEN R62,50 (Sun R75) / VENUE R95 (Sun R114)
Rate choice: Warehouse or Event/Venue (“warehouse”/“wearhouse” wording, other work type)	red	Warehouse / Event-Venue
Public holiday — ...	red	Approve R... / Other amount / Decline
Petrus: time outside 06–16 on a weekday / Petrus: Sunday entry	red	Approve R55/h · other rate · R0 / Approve Sunday · other · Decline
Manual overlap review (engine) — with “What overlaps what” proof box	orange	Approve only uncovered hours / Pay as claimed / No issue
Double claim — already paid (engine, catch-up > 1 week)	red	0 h
STALE DRAFT (before capture window)	red	🗑 Delete draft
🕒 CLAIMED PAST hh:mm	red pill	follow-up panel next week
Every decided review	green “Decided: ...”	🔁 Reopen if you need to change it

Self-compare reviews (draft vs its own paid row) are auto-voided. Decided flags never re-open by themselves; flags void themselves when the entry is deleted/corrected. **Pay-rule check panel retired 23 Sep** — do not rebuild it.

C8 — What the auditor sees (Excel, 6 tabs)

1 **Wage Detail Linked** (per shift: claimed/approved/effective hours & rand, rate, breakdown, review #, decision; yellow editable) · 2 **Auditor Trail Linked** (Sat...Fri HR/Amount, 6 missed shifts, hours, wages, fixed deductions due/deducted/outstanding, loans due/deducted/outstanding, total deducted, **NET WAGE**; formula-linked) · 3 **Auditor Summary** · 4 **Flagged – Reviewed** (every review, decision, who, when; per-worker pastel band, OPEN pink) · 5 **Loans & Deductions** (fixed deductions in force, every loan with balance and due-this-week, repayment history) · 6 **Missed Shifts**. Pricing precedence in the Excel: **owner correction on the row (manager_update_reason) is final** → RESOLVED rand decision (already-paid / difference) → RESOLVED approved hours priced by place → claimed. Fixed deduction counts in a week when effective_from <= weekEnd and (effective_to null or >= weekStart). Loan counts when active and deduction_start_date <= weekEnd, min(deduction_amount, outstanding).

C9 — Deductions & loans on the books (24 Sep 2026)

Fixed (weekly, ongoing): #3 Erick Car Payment R1 000 (from 1 Aug) · #1 Isaac Eggs R260 (from 1 Aug) · **#5 Joshua Car Payment R1 000 — from the 26 Sep payroll** (paid over to Joshua on the 25th monthly). Ended: #2 Petrus Rent R450 (18 Sep) · #4 Isaac Car R500 (23 Aug). **Additional loans**: #1 Erick R2 000 → R500 left, R500/wk · #2 Isaac R900 → R350 left, R250/wk · #3 Isaac R600 → R150 left · #6 Isaac R600 (kids’ trip) → R600 due 19–25 Sep, left as scheduled · **#7 Erick R500** (22 Sep, asked R600) → R500 once, 26 Sep payroll · **#8 Isaac R500 fuel** (22 Sep) → R250 on 26 Sep + R250 on 3 Oct · #5 Daniel R3 000 CT scan → **paid in full outside payroll**, no deductions. **Open question for Bernie**: Isaac’s 26 Sep week would total R1 250 of loan deductions (+ R260 eggs) — cap or leave?

C10 — Standing rules (owner’s, never to be broken)

1 Never break the staff flow — all checks on the office side. 2 Dashboard stays up while work is done. 3 Nothing is paid/unpaid/changed automatically — Bernie clicks. 4 A review must carry proof (the paid row: times, place, hours, rand, payroll). 5 Already paid → only the difference. 6 Rate comes from the place/work type; Bernie changes hours, never types a rate. 7 **Closed payrolls are closed** — corrections are a visible line in the current payroll. 8 Wednesday rule (estimates corrected next week). 9 Restore point + preview test with real cases + show Bernie before deploying; report old → new. 10 Keep the old CSV/Excel buttons until told. 11 Warehouse Team = warehouse only if the place says so. 12 Meeting deducted on holidays too. 13 Owner-set day → follow-up panel → only underpayments corrected. 14 One shift, one row. 15 An owner correction on a row is final.

D — TECHNICAL: WHAT THE SYSTEM IS

D1 — Architecture

- **Domain** <https://bwprodsystem.co.za> → Cloudflare Pages project **bw-productions** (branch main = production; branch realdate-test = preview).
- The project is a **Hono / TypeScript proxy** (`src/index.tsx`, ~5 800 lines). It sits in front of the original wages engine (UPSTREAM_ORIGIN = <https://3c3bcb89.bw-productions.pages.dev>, an older deployment of the same Pages project) and **rewrites its HTML with HTMLRewriter** to inject the new look, panels, buttons and rules, and adds its own routes. The engine still stores drafts/shifts and does the raw Final Submission; the proxy re-prices at submission (`applyOwnerRatesToFinalSubmission`) and writes the owner rules into the same D1 tables.
- **Database:** Cloudflare D1 **bw-productions-db** (id 4781960f-5bd6-4381-93fd-d8caf72f0c53), binding DB. R2 bucket `bw-productions-pdfs` (binding PDF_BUCKET, older PDF feature).
- **Stack:** Hono ^4, Vite 5 + `@hono/vite-cloudflare-pages`, Wrangler 3, TypeScript 5, `fflate + xlsx` (Excel written by `src/xlsx-lite.ts / payroll-excel.ts`). Frontend is server-rendered HTML + inline CSS/JJS (no framework); gold #c9a84c accent, logo `public/static/bw-logo.png`.
- **Auth:** office cookie `bw_session = base64(json{id,name,email,role,exp}).hmacSHA256hex` with `ADMIN_SESSION_SECRET` in `index.tsx` (`adminUserFromCookie`). Worker session `bw_wage_session` (engine, name + PIN). Office can open a worker's draft via `/wages-admin/edit-draft/:id` (issues a 2 h worker session).

D3 — Routes added by the proxy

Route	Does
GET <code>/wages-version</code> · GET <code>/wages-health</code>	version string / health
GET <code>/admin/wages?from=YYYY-MM-DD</code>	office dashboard (proxied + injected)
GET <code>/wages-admin/payroll.xlsx?from=</code>	auditor Excel
POST <code>/wages-admin/review-decision</code>	approve hours / R0 / pay as claimed on a review
POST <code>/wages-admin/rate-choice</code>	WAREHOUSE / VENUE click (full day, or difference only when an earlier-payroll overlap exists)
POST <code>/wages-admin/paid-before-decision</code>	Already-paid: approve recommended / nothing due / changed hours
POST <code>/wages-admin/petrus-extra</code> · <code>/wages-admin/holiday-decision</code>	Petrus outside-hours / Sunday; public-holiday approve/other/decline
POST <code>/wages-admin/reopen-review</code>	↺ Reopen (keeps <code>decisionHistory</code> , reverses add-ons)
POST <code>/wages-admin/delete-draft</code>	🗑 Delete draft (copy to <code>wage_debug_capture</code> , voids reviews)
POST <code>/wages-admin/confirm-holiday-hours</code>	follow-up panel Confirm (top-up row only if diff > 0)
POST <code>/wages-admin/manager-update</code> (🔑 Edit shift)	owner correction on a paid row (<code>manager_update_reason</code>)
GET <code>/wages-admin/edit-draft/:id</code>	open a worker's draft as the office
Worker <code>/wages/*</code>	proxied; Save/Final Submission intercepted for the duplicate & already-paid blocks and re-pricing

D4 — Database tables (D1) that matter

`wage_staff` (id, `display_name`, `payroll_rule` hourly/fixed_weekly, standard_weekly_amount) · `wage_work_rates` (staff|work type own rates e.g. House 62.5) · `wage_shift_drafts` · `wage_shifts` (paid rows: start/end, work_type, venue, area, description, amount, hourly_rate_snapshot, normal_hours, payroll_week_start, **manager_update_reason**, **payroll_note**, calculation_version, source_draft_id) ·

wage_payroll_reviews (issue_key unique e.g. paid_before|shift:ID, crew_pattern|draft:ID, holiday|shift:ID, petrus_extra|shift:ID; status OPEN/RESOLVED/VOID; approved_hours/amount; **system_snapshot_json** with placeDecision, differenceOnly, differenceText, approvedExtraAmount, decisionHistory, followUpNextWeek, ownerEndTime) · wage_planned_hours (work_date PK, planned_end, note, set_by) · wage_public_holidays · wage_recurring_deductions (fixed: type, amount, effective_from/to, active) · wage_weekly_deductions · wage_additional_loans (+_repayments) · wage_debug_capture (every block/deletion logged) · wage_deleted_shifts, wage_shifts_removed_audit · wage_payroll_periods · wage_sessions, wage_login_attempts. Staff ids: Givemore 1 · Takavaudza 2 · Thina 3 · Petrus 4 · Bhekizitha 5 · Isaac 6 · John 7 · Erence 8 · Erick 9 · Daniel 10 · Solomon 11 · Brian 12 · Patrick 13 · Thandanani 14 · Joshua 15 · Lebo 16 · Sharleen 17.

D5 — Look & feel (so it can be recreated)

- Staff app: big white cards, gold accent #c9a84c, 19 px bold names, chevrons; one form per shift (date, start, end, work type, venue, area, description); **Final Shift Check** with real dates and tick boxes; *Submitted* — *locked* cards; *Finally submitted shifts* list; red banner messages for refusals.
 - Office dashboard, top to bottom: header with **Download Payroll Excel (new)** + old export buttons · red **Public-holiday follow-up panel** (only the week after an owner-set holiday) · per-worker sections alphabetically: name, yellow claimed pill 59.00 hours · R5 190,00, green **Admin approved** pill (amber “N reviews still open”), orange **N open reviews** ▼; rows per day with pink **MISSED SHIFT**, red **REVIEW – ACTION NEEDED**, orange **REVIEW – open**, green **REVIEW – RESOLVED** + **Reopen**, red **CLAIMED PAST**, grey hours column “7,50 h paid (8,00 clocked)”, gold **Edit shift / Open X’s worker app**, red **STALE DRAFT** + ; review cells = white box with proof lines and big green APPROVE button · bottom: **Fixed deductions** and **Additional loan deductions to review** tables (read-only preview, grand total still to deduct).
 - No Pay-rule check panel (retired).
-

E — REBUILD FROM SCRATCH (if the repo is lost too)

1. Create Cloudflare Pages project bw-productions bound to D1 bw-productions-db (existing data — never recreate the DB; if it is gone, the auditor Excel files in docs/ are the record of every paid payroll).
 2. Hono + Vite Cloudflare Pages template; copy wrangler.jsonc from D1 above; npm i hono fflate xlsx.
 3. Implement in this order, testing each on the preview branch with real rows: (a) proxy + HTMLRewriter shell and version endpoint → (b) rate engine C2–C4 with the constants in D2 and unit examples in C2/C4 → (c) Final Submission re-pricing + midnight split → (d) dashboard injector: pills, green figure,  Edit → (e) reviews framework (wage_payroll_reviews, issue_key, decision routes, Reopen) → (f) Already-paid engine (C5) → (g) crew/area check (C7) → (h) public holidays + planned hours + follow-up panel → (i) double-tap protection (C6) → (j) Excel (C8) → (k) deductions/loans panels.
 4. Verify: npx tsc --noEmit clean of new errors; Excel vs DB 0 mismatches script; live test with temporary drafts, always deleted afterwards.
 5. Tag, snapshot data JSON into docs/restore-..., update this pack.
-

F — WHERE THE COPIES ARE

- **GitHub**: <https://github.com/BWProductions/B-W-Costing> — main pushed 24 Sep 2026 with all tags (first push since 12 Sep; keep pushing after every session: git push origin main --tags).
- **Cloudflare**: production deployment history in the Pages project (each deploy is roll-back-able from the Cloudflare dashboard too).
- **Docs in the repo**: this pack, the long handover, auditor Excel files, restore JSONs.
- **Sent to Bernie**: PDF of this pack and of the handover (Genspark file links in chat).

Prepared for B&W Productions — Bernie Burness — 24 September 2026.
